Engineering in Medicine

Volume 11 1982

Author Index

Afoke, N. Y. P. Finite element study of the human hip joint, 17
Aitken, J. A. Plaster shears—overcoming design weaknesses, 97
Andersen, K. Ligament function and joint stability elucidated by a new technique, 77
Andersson, G. B. J. Disc pressure measurements when rising and sitting down on a chair, 189

Bader, D. L. Biomechanical and clinical assessment of hip nerve block in unilateral osteoarthrosis, 39
Bahrani, A. S. History and development of artificial limbs, 155
Barbenel, J. C. Response of human skin to small tensile loads *in vitro*, 43
Baril, J. D. Proposed design for an expanding hip nail, 187
Bolton, J. D. Study of corrosion fatigue in cast cobalt–chrome–molybdenum alloys, 59
Boukes, R. J. Reliability of dynamometry in patients with a neuromuscular disorder, 169
Bowker, P. Comparative study of the properties of bandage-form splinting materials, 125
Byers, P. D. Finite element study of the human hip joint, 17

Dahlkvist, N. J. Forces during squatting and rising from a deep squat, 69
Day, J. B. Kinesiologic and biomechanical assessment of the Charnley 'load angle inlay' knee prosthesis, 25
de Boer, A.
Biomechanical analysis of the functions of the deltoid during abduction of the arm, 3
Reliability of dynamometry in patients with a neuromuscular disorder, 169
de Dombal, F. T.
Computers in medical administration (book review), 102
Management of technology in health and medical care (book review), 102
Dobbs, H. S. Alloys for orthopaedic implant use, 175
Dowson, D. Walking activity of patients with artificial hip joints, 95
Drerup, B. Contourometric evaluation of moiré topograms by nomographic techniques, 33

Edmonds-Seal, J. Biomechanical and clinical assessment of hip nerve block in unilateral osteoarthrosis, 39
Ewald, F. C. Variables affecting the fixation of tibial components, 83

Fuller, D. J. Biomechanical and clinical assessment of hip nerve block in unilateral osteoarthrosis, 39

Gill, J. M. Comparative study of the properties of bandage-form splinting materials, 125
Gola, M. M. Developments in transducer stems for mechanical coupling measurements in endoprosthetics, 183
Granholm, J. Fixation of femoral components of condylar knee prostheses, 135
Gugliotta, A. Developments in transducer stems for mechanical coupling measurements in endoprosthetics, 183

Hardinge, K. Kinesiologic and biomechanical assessment of the Charnley 'load angle inlay' knee prosthesis, 25
Hayden, J. Study of corrosion fatigue in cast cobalt–chrome–molybdenum alloys, 59
Hickey, D. S. Computer graphics illustration of the operation of the intervertebral disc, 11
Higginson, G. R. Introduction to the biomechanics of joints and joint replacement (book review), 195
Huddleston, T. Load cell system in foot pressure analysis, 121
Hukins, D. W. L. Computer graphics illustration of the operation of the intervetebral disc, 11
Humphreys, M. Study of corrosion fatigue in cast cobalt–chrome–molybdenum alloys, 59
Hutton, W. C. Finite element study of the human hip joint, 17

James, W. V.
Clinical electrogoniometry system, 123
History and development of artificial limbs, 155
Load cell system in foot pressure analysis, 121
Johnson, F. Comments on the design of an instrument to measure spasticity in the arm—SAM, 47

Jones, E. W. Comments on the design of an instrument to measure spasticity in the arm—SAM, 47

Khodadadeh, S. Biomechanical and clinical assessment of hip nerve block in unilateral osteoarthrosis, 39
Klein, J. A. Computer graphics illustration of the operation of the intervertebral disc, 11

Lee, D. Contributions and consequences of clinical engineering, 163
Lowrey, R. Fixation of femoral components of condylar knee prostheses, 135

Mayo, P. Forces during squatting and rising from a deep squat, 69
McKellop, H. Wear of artificial joints, 55
Milden, J. Variables affecting the fixation of tibial components, 83
Milner, J. B. Dropfoot brace mechanism, 51
Minns, R. J.
Kinesiologic and biomechanical assessment of the Charnley 'load angle inlay' knee prosthesis, 25
Pressures under the ischium detected by a pedobarograph, 111
Two simple plantar pressure recording devices in clinical use: evaluation using a pedobarograph, 117
Mizrahi, J. Analysis of parameters affecting impact force attenuation during landing in human vertical free fall, 141
Mulley, G. P. Comments on the design of an instrument to measure spasticity in the arm—SAM, 47
Munton, J. S. Overview of research on seating, 107

Nachemeson, A. Disc pressure measurements when rising and sitting down on a chair, 189
Natale, D. Contributions and consequences of clinical engineering, 163

Orr, J. F.
Clinical electrogoniometry system, 123
History and development of artificial limbs, 155
Load cell system in foot pressure analysis, 121

Örtengren, R. Disc pressure measurements when rising and sitting down on a chair, 189

Paton, J. S. Plaster shears—overcoming design weaknesses, 97
Paul, J. P. Conference on engineering in orthopaedic surgery and rehabilitation, 191
Plant, G. R. Comments on the design of an instrument to measure spasticity in the arm—SAM, 47

Raftopoulos, D. Proposed design for an expanding hip nail, 187
Rasmussen, O. Ligament function and joint stability elucidated by a new technique, 77
Robertson, J. L. M. Alloys for orthopaedic implant use, 175
Rodwell, T. R. T. Carshalton halo-pelvic distraction apparatus, 89

Scholten, P. J. M. Biomechanical analysis of the functions of the deltoid during abduction of the arm, 3
Seedhom, B. B. Forces during squatting and rising from a deep squat, 69
Shaw, A. Plaster shears—overcoming design weaknesses, 97
Simendinger, E. A. Contributions and consequences of clinical engineering, 163
Sterk, J. C. Reliability of dynamometry in patients with a neuromuscular disorder, 169
Stuart, C. R. Comments on the design of an instrument to measure spasticity in the arm—SAM, 47
Susak, Z. Analysis of parameters affecting impact force attenuation during landing in human vertical free fall, 141
Sutton, R. A. Pressures under the ischium detected by a pedobarograph, 111

Thatcher, J. Variables affecting the fixation of tibial components, 83
Turner, A. Biomechanical and clinical assessment of hip nerve block in unilateral osteoarthrosis, 39

Vuisting, W. Biomechanical analysis of the functions of the deltoid during abduction of the arm, 3

Walker, P. S.
Fixation of femoral components of condylar knee prostheses, 135
Variables affecting the fixation of tibial components, 83
Wallbridge, N. Walking activity of patients with artificial hip joints, 95
Wan Abas, W. A. B. Response of human skin to small tensile loads *in vitro*, 43
Wright, V. Conference on biomechanical aspects of seating for the disabled, 99

Subject Index

Titles of papers are shown in bold type

Abduction of the arm, deltoid function, 3
Acrylic bone cements, 53
Adhesives in medicine, 100
Alloys for orthopaedic implant use, 175
Amputation
congenital below-elbow, 192
history, 155
Analysis of parameters affecting impact force attenuation during landing in human vertical free fall, 141
Ankle joint, stability elucidation, 77
Annulus fibrosus, lamellar structure, 11
Arm
Deltoid functions during abduction, 3
spasticity measurement system, 47
Artificial limbs
above-knee, 158
below-knee, 158
developments between 1500 and 1945, 156
developments up to 1500, 155
history and development of, 155
prosthesis design, 159
recent developments, 158
scientific approach to development, 160
types of structure, 160
upper limb prostheses, 159

Bandage-form splinting materials, 125
Batricar electric vehicle, 193
Baycast bandage-form splinting materials, 125
Biomechanical analysis of the functions of the deltoid during abduction of the arm, 3
Biomechanical and clinical assessment of hip nerve block in unilateral osteoarthrosis, 39
Biomechanics of joints and joint replacement, 195
Biotechnology pilot plant, 194
Bone, cancellous, mechanical properties of, 18
Bone cements, acrylic, 53

Carshalton halo-pelvic distraction apparatus, 89
advantages of, 92
bio-engineering considerations, 90
engineering description of apparatus, 89
evolution from Hong Kong apparatus, 91
historical review, 91
limitations of, 93
method of application and use, 90
Cartilage
mechanical properties of, 18
role in human hip joint, 17
Cast alloys, Co–Cr–Mo, 59, 175
Cements, acrylic, 53
Cerebral palsy, mobility aids, 192
Charnley 'load angle inlay' knee prosthesis, 25
Clatterbridge Hospital, cyclotron, 151
Clinical electrogoniometry system, 123
Clinical engineering, 163
alternatives in, 163
available technology, 163
cost-effectiveness, 163
defining the need, 164
departmental costs, 166
environmental safety, 165, 166
equipment acquisition, 164
equipment safety, 165
evaluating special devices, 164
existing technology, 163
in-service training, 166
justifying the need, 164
new and existing technologies, 163
new devices and methods, 164
receiving and accepting new device, 165
safety aspects, 165
technological growth, 163
time problem in training, 166
Cobalt–chromium–molybdenum alloys
corrosion fatigue, 59
implant use, 175
Comments on the design of an instrument to measure spasticity in the arm—SAM, 47
Comparative study of the properties of bandage-form splinting materials, 125
Computer graphics illustration of the operation of the intervertebral disc, 11
Computers
electrogoniometry system, 123
in medical administration, 102
Conference on biomechanical aspects of seating for the disabled, 99

Conference on engineering in orthopaedic surgery and rehabilitation, 191
Contact lenses, automatic production, 150
Contourometric evaluation of moiré topograms by nomographic techniques, 33
Contributions and consequences of clinical engineering, 163
Corrosion, alloys for implant use, 175
Corrosion fatigue
  alloys for implant use, 175
  cast Co–Cr–Mo alloys, 59
  frequency effects, 63, 66
Crack growth characteristics, 63
Crack growth rates in Ringer's solution, 59
Crystona bandage-form splinting materials, 125
Cyclotron, Clatterbridge Hospital, 151

Deltoid
  functions during abduction of the arm, 3
  moment generated by, 6
Developments in transducer stems for mechanical coupling measurements in endoprosthetics, 183
Digitisers in biomechanics research, 100
Disabled persons
  seating for
    biomechanical aspects, 99
    research, 108
    taxi prototype, 193
Disc pressure measurements when rising and sitting down on a chair, 189
Dropfoot brace mechanism, 51
Dynamometry, reliability in patients with neuromuscular disorder, 169

Elbow locking device, EMG controlled, 192
Elderly persons, seating research, 109
Electric vehicle, Batricar, 193
Electric wheelstand for paraplegics, 53
Electrical stimulation techniques, 191
Electro-cardiogram, transtelephonic monitoring, 100
Electrogoniometry, lower limb joint measurement, 123
Electromyography, seating research, 107
Endoprosthetics, transducer stems for mechanical coupling measurements, 183

Falls
  parameters affecting impact force attenuation during landing, 141
  shock attenuation in, 141
Fatigue, *see also* Corrosion fatigue
Femoral components
  failure of, 191
  fixation of condylar knee prosthesis, 135
Femur, prosthesis stem coupling measurements, 183
Finite element study of the human hip joint, 17
Fixation of femoral components of condylar knee prostheses, 135
Foot, pressure measurement, 117, 121
Foot pressure profile platform, 121
Force–length relation of an element, 4
Forces during squatting and rising from a deep squat, 69
Fracture bracing, 191
Fracture fixation systems, 191

Gait analysis
  in osteoarthrosis, 39
  post-operation, 30–31
Gait parameters in osteoarthrosis, 40
Gait symmetry in osteoarthrosis, 42
Goniometry, lower limb joint measurement, 123
Gypsona bandage-form splinting materials, 125

Hand, electrically operated cosmetic functional, 192
Heart surgery, pressure relief valve for, 194
Hexcelite bandage-form splinting materials, 125
Hip fractures
  expanding nail fixation device, 187
  fixation devices, 187
Hip joint
  artificial, walking activity of patients, 95
  axisymmetric model, 17, 20
  coronal model, 19, 22
  finite element study, 17
  replacement surgery, 191
Hip nerve block assessment in osteoarthrosis, 39
History and development of artificial limbs, 155
Hong Kong apparatus, 91
Human skin response to tensile loads, 43
Humerus, rotation of, 5

Impact force in falls, 141
Interferential therapy, 53
Intervertebral disc, computer graphics illustration of, 11
Ischium, pressure recording, 111

Joint replacement
  biomechanics, 195
  review of, 191
  ankle. *See* Ankle joint
  artificial, wear of, 55
  biomechanics, 195
  hip. *See* Hip joint
  lower limb measurement, 123

Kidney stones, shock wave treatment for, 151
Kinematic assessment of dropfoot brace, 51
Kinesiologic and biomechanical assessment of the Charnley 'load angle inlay' knee prosthesis, 25
Knee forces during squatting, 69
Knee joints
  bone and interface around tips of stems, 139
  bone immediately proximal to flange, 139
  cement–bone interface along the posterior condyles and patella flange, 139
  distal cement–bone interface, 138
  distal layer of bone, 138
Knee prosthesis
  Charnley 'load angle inlay', 25
  condylar replacement, 83
  fixation of femoral components, 135
  see also Tibial components

Lamellar structure of intervertebral disc, 11
Lifting devices, patient, 192
Ligament function and joint stability elucidated by a new technique, 77
Limb prosthesis, research and development, 191
Limbs, artificial. *See* Artificial limbs
Linear accelerators, 100
Load cell system in foot pressure analysis, 121
Lumbar disc, pressure measurements on rising and sitting, 189

Medicine, science and art of (exhibition), 53
Membrane lung for open-heart surgery, 194
Mobility aids, 191, 192
Moiré topograms, contourometric evaluation, 33
Muscle forces during squatting, 69

Nerve stimulation, transcutaneous electrical, 150
Neuromuscular disorder, reliability of dynamometry in patients with, 169
NMR imager for medical diagnosis, 194
Nottingham spastic arm measurement system (SAM), 47

Oesophageal pressure measurement, 54
Open-heart surgery, membrane lung for, 194
Orthopaedic surgery, conference on engineering in, 191
Orthopaedics, implant alloys, 175
Osteoarthrosis, hip nerve block assessment, 39
Overview of research on seating, 107

Pain relief in osteoarthrosis, 39
Paraplegics
  electric wheelstand for, 53
  seating pressure recording, 111
Paris law, 63
Patello-femoral compartment, forces in, 72
Patient lifting devices, 192
Pedobarograph
  design, 111
  plantar pressure recording, 117
  seating pressure recording, 111
Plantar pressure recording devices, 117
Plaster of Paris, bandage-form, 125
Plaster shears—overcoming design weaknesses, 97
Plastic mould for radiotherapy, 100
Poisson's ratio, human skin, 43
Polymers, pharmaceutical applications (book review), 102

Powder metallurgy, Co–Cr–Mo alloys, 175
Pressure measurement
  foot, 121
  foot–ground, 117
  oesophageal, 54
  rising and sitting, 189
Pressure relief valve for heart supply, 194
Pressures under the ischium detected by a pedobarograph, 111
Princess Margaret Rose Orthopaedic Hospital, 191
Proposed design for an expanding hip nail, 187
Prosthesis stem-femur coupling measurements, 183

Radiotherapy, plastic mould for, 100
Rehabilitation equipment, 192
Reliability of dynamometry in patients with a neuromuscular disorder, 169
Renal calculi, shock wave treatment, 151
Response of human skin to small tensile loads *in vitro*, 43
Ringer's solution, crack growth rates in, 59

Scapula, rotation of, 5
Seating
  anatomy, 107
  anthropometrics, 107
  comfort research, 108
  disabled persons, 108
  ease of rising, 108
  elderly persons, 109
  for the disabled
    biomechanical aspects, 99
    research, 21
  muscle activity, 107
  overview of research, 107
  pressure measurements on lumbar disc, 189
  pressure recording, 111
  shapeable matrix system, 192
  support surfaces, 108
  weight-bearing, 108
Shears, plaster. *See* Plaster shears
Shock attenuation in falls, 141
Shock wave treatment for kidney stones, 151
Shoulder, total prosthesis, 191
Sigmoidoscope, disposable tube and obturator, 101
Sinus problems, ultrasonic diagnosis, 193
Sitting down, pressure measurements on lumbar disc, 189
Skin, human. *See* Human skin
Spasticity measurement in the arm, 47
Sphygmomanometer, digital, 54
Spine in traction analogy, 93
Splinting materials, bandage-form, 125
Squatting
  forces during, 69
  forces during rising from, 69
Stance phase flexion–extension characteristic, 28
Stroke, potential detection by Doppler imaging, 150
Study of corrosion fatigue in cast cobalt–chrome–molydenum alloys, 59
Superconducting magnet systems, 193

Taxi, disabled persons, 193
Technology
  adapting in clinical engineering, 163
  growth in clinical engineering, 163
  in health and medical care (book review), 102
  surveying available, 164
Tensile tests
  alloys for implant use, 175
  human skin, 43
Threshold crack growth effects, 66
Threshold stress intensity, 66
Tibial components, variables affecting fixation of, 83
Titanium-318 alloy, 175
Titanium-550 alloy, 175
TMR (topical magnetic resonance) spectrometer, 54
Traction frame project, Teesside Polytechnic, 53, 151
Transcutaneous electrical nerve stimulation, 150
Transducer stems, mechanical coupling measurements in endoprosthetics, 183
Transpulmonary pressure measurement, 54
Transtelephonic ECG monitoring, 100
Two simple plantar pressure recording devices in clinical use: evaluation using a pedobarograph, 117

Ultrasonic diagnosis, sinus, 193

Vacuum formers for radiotherapy moulds, 100
Variables affecting the fixation of tibial components, 83
Vascular studies, 150

Walking activity of patients with artificial hip joints, 95
Wear of artificial joint materials, 55
